Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that the reference does not teach nor suggest the difference between dynamic surface tension and static surface tension. However, it is the position of the Examiner that he composition of the reference is identical to the claimed composition and identical composition must have the same properties. See MPEP 2112.01 I. For these reasons, the composition of the reference are presumed to inherently posses the claimed properties. Applicant also argues the effective date of the reference is September 22, 2003. Applicants' claimed priority date is November 15, 2002 and thus antedates the effective date of the cite reference. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.
